5TH EDITION

The Law of Shipbuilding Contracts

Simon Curtis, Ian Gaunt and William Cecil

Series: Lloyd's Shipping Law Library

The Law of Shipbuilding Contracts examines the principles of English contract law as these apply to shipbuilding. The leading text on shipbuilding and marine construction, widely used by the global maritime community, this new edition is updated to account for the "long tail" effects of the global economic crisis on the sector. A comprehensive and authoritative resource, this book is essential reading for buyers and charterers of newbuilding tonnage, shipbuilders and offshore construction yards, shipbrokers, banks and other finance providers, lawyers and insurers working in the maritime and offshore oil and gas sectors, as well as students of maritime law.
