Haynes Boone's lawyers have been helping clients navigate every aspect of the energy industry for more than 50 years. Our experience includes sophisticated financings, high-stakes M&A transactions, complex regulatory issues, bet-the-company litigation and arbitrations, and debt restructurings and Chapter 11 cases.

Our Energy Roundup page includes links to our reports, surveys, videos and events to help keep our clients and contacts well-informed of industry developments. We follow market trends, harvest commodity data and survey C-suite executives at energy companies, financial institutions, private equity firms and professional service providers. Our team distills and presents our findings in the items listed below to provide industry stakeholders with actionable, forward-looking insights.
