Since the America Invents Act's new post-grant procedures were implemented in 2012, Haynes Boone's Intellectual Property (IP) Practice has been a leader in helping clients protect their patents and invalidate others' claims at the U.S. Patent and Trademark Office (USPTO). These trial proceedings include *inter partes* review (IPR), covered business method (CBM) review, post-grant review (PGR), and other proceedings before the Patent Trial and Appeal Board (PTAB).

Haynes Boone is a top 10 law firm filing IPRs on behalf of the Petitioner, with an institution rate of 78% and a final decision rate of 82% for canceling claims (*Docket Alarm*, 2022).

Haynes Boone attorneys have been involved in over 500 IPR and CBM proceedings before the PTAB, most of which are directed to patents in litigation. Our vast experience in administrative proceedings before the USPTO, and our national patent litigation practice, have made Haynes Boone one of the firms clients seek for PTAB trials.

Our team of lawyers regularly work with clients in an array of industries, including Internet, computer software, networks, protocols, information security, telecom equipment and standards, energy, imaging systems, semiconductor devices and fabrication, automotive, and business methods.

In the Electrical/Computer space, we have particular experience in:

- Computer software
- Information security and coding
- Computer architecture (including microprocessors)
- Medical devices and imaging
- Networking equipment and protocols
- Semiconductor devices, packaging and fabrication
- Telecommunication equipment and standards
