Haynes Boone London Partners [James Brown](#), [William Cecil](#) and [Andreas Dracoulis](#) contributed a chapter in Global Arbitration Review's (GAR's) recently published Guide to Energy Arbitrations – Fourth Edition.

The Guide to Energy Arbitrations is a widely regarded reference tool for energy companies, their advisers and arbitrators. Written by authors who are renowned in the industry, the guide compiles information on the multitude of issues that may arise in energy disputes and provides guidance for minimizing the risk of and resolving such disputes.

For more information on the Guide to Energy Arbitrations, click [here](#).

## About the Chapter

The chapter on Offshore Vessel Construction Disputes provides an overview about why arbitration is the typically adopted method of dispute resolution for newbuilding projects of offshore oil and gas industry vessels, the types of disputes that commonly arise both pre- and post-delivery, and ways such disputes are usually resolved. It also considers some strategies commonly adopted for successful resolution by arbitration.
