FDA: SARS-CoV-2 (COVID-19) Is Not a Food Safety Threat

By: Suzie Trigg, Joanna Pearce, and Sally Dahlstrom

As many Americans begin weeks of unwanted shut ins, the food industry is heading to work or working from home, with the goal of keeping a strong, safe, and abundant food supply. As recognized in guidance recently issued by the Department of Homeland Security, food producers and many of the businesses that support them are essential. Still, amidst the crisis, fears about the safety of food – and the ability of food and food packaging to transmit the novel coronavirus – have spread quickly. But the FDA has sought to reassure Americans that food is safe, providing a dedicated [page](#) for COVID-19 and stating that “[c]urrently there is no evidence of food or food packaging being associated with transmission of COVID-19.” The FDA’s remarks during a March 18th stakeholder briefing were similar. FDA Issues Guidance for Conducting Clinical Trials During COVID-19.

By: Phil Kim, Suzie Trigg, Jennifer Kreick, and Kayla Cristales

The FDA issued [Guidance](#) for Industry, investigators, and institutional review boards (IRBs) conducting clinical trials during the COVID-19 pandemic. The FDA recognized that certain challenges may arise in connection with COVID-19 that may create difficulty for clinical trials, such as quarantines, site closures, travel limitations, interruptions to the supply chain for the investigational product, or other considerations if site personnel or trial subjects become infected. Protocol modifications may be required, and there may be unavoidable protocol deviations. In its guidance, the FDA outlines considerations to assist sponsors in assuring the safety of trial participants, maintaining compliance with good clinical practices (GCPs), and minimizing risks to trial integrity. Noted considerations include, among others, the following: [Read the full article here.](#)

FDA Demonstrates Regulatory Flexibility and Relaxes Policies on Hand Sanitizer Amid COVID-19

By: Suzie Trigg, Kayla Cristales, and Sally Dahlstrom

The rapid spread of Coronavirus Disease 2019 (COVID-19) has sparked public fear and panic-induced stockpiling of alcohol-based sanitizing gels, leaving retailers and consumers without access to hand sanitizer. In response, the FDA has issued two new guidance documents on the preparation of certain alcohol-based hand sanitizer products by compounding pharmacies or by other manufacturing firms that register as over-the-counter (OTC) drug establishments to prepare alcohol-based hand sanitizers. In addition, the Alcohol and Tobacco Tax and Trade Bureau (TTB) has issued guidance that permits distilleries to produce hand sanitizer for the duration of the current

emergency. These measures demonstrate the willingness of regulatory agencies to allow for flexible, practical approaches to meeting consumer and Industry needs. [Read the full article here.](#)

Quick Shots

FDA Scales Back Domestic Inspections Amid COVID-19 Pandemic. The FDA [announced](#) that it has temporarily postponed all domestic routine surveillance facility inspections. [Read the full article here.](#)
