Welcome to the Summer edition of our newsletter.

This edition contains articles on supply chain issues in the offshore wind market, alternative funding for renewable energy projects and the regulation of autonomous vessels.

There are alerts looking at recent decisions of the English courts on the interrelationship between a bill of lading and a charterparty, concluding a contract, interpretation of a liability clause and the enforceability of limitation and exclusion clauses. There are also two alerts on the regulation of artificial intelligence and a brief commentary on other recent and interesting decisions of the English courts in our case summaries below.

Finally, please do take a moment to read our London Office News about the arrival of an eleven-strong London Venture Capital team, and the promotion of Jonathan Morton to counsel.
