---

**PRACTICES** International, Shipping, Offshore Oil and Gas

---

We are pleased to bring you our first Newsletter Digest, a round-up of our quarterly shipping and offshore newsletters from 2022 that might be relevant to your business success in 2023.

In 2022, we provided you with articles looking at issues across the Shipping, Offshore Energy and Renewable Energy sectors from changes in legislation and new case law in England and Wales to the global issues which impacted these sectors in the last year. We also produced publications on ship conversion contracts, knock for knock indemnities and limitation of liability clauses, as well as an update to the fifth edition of the Law of Shipbuilding Contracts by Simon Curtis, Ian Gaunt and William Cecil. All of these are available via our 2022 Year in Review.
