

Kreick in Law360: The High-Stakes Healthcare AI Battles to Watch In 2026

January 6, 2026 Jennifer Kreick

PRACTICES AI and Deep Learning, AI and Technology, Healthcare and Life Sciences

In a recent *Law360* article, Haynes Boone Partner [Jennifer Kreick](#) shared her thoughts on how lawsuits involving ambient AI tools may shape patient-consent requirements and influence future laws around data retention and deletion.

Read an excerpt below.

Jennifer Kreick, co-chair of Haynes Boone's healthcare and life sciences practice group, told Law360 that the outcome of this litigation could inform best practices for obtaining and documenting patient consent around ambient AI usage and provide clarity on potential liability.

It could also lead to greater obligations imposed on AI vendors related to consent and opt-outs, as well as new laws around the retention and deletion of data.

"[T]he requirements for how to obtain appropriate patient consent [for] use of these tools are not well-defined," she said.
