

AI Chats Episode 20: What Can We Learn From Tax Compliance Robots?

August 9, 2022 Hong Shi

PRACTICES Patent Prosecution and Counseling, Patent Litigation, AI and Technology, Intellectual Property Litigation, AI and Deep Learning

Haynes Boone Counsel Hong Shi speaks with Professor Susan Morse from University of Texas, School of Law, to discuss legal regulation for AI. While AI has the potential to transform many industries, there are concerns about potential misuse of AI. Do AI systems follow the law? What design choices can the law make to encourage legal compliance by robots? Professor Morse provides insights into these important questions, with her study of tax compliance robots, such as TurboTax that actually many of us use.
