

AI Chats Episode 22: Protecting AI Innovations in China

September 6, 2022 Hong Shi

PRACTICES Intellectual Property Litigation, AI and Deep Learning

Welcome to a new episode of AI Chats, a podcast series produced by the law firm of Haynes Boone and lawyers from its AI and Deep Learning Practice Group to explore the exciting, ever-evolving, and occasionally controversial world of artificial intelligence.

In this episode of the AI Chats podcast, Haynes Boone Counsel Hong Shi is joined by Chenyan Wu, Partner at Beijing Elite Group, to discuss the rapid AI growth and the protection of AI innovations in China. In the past decade, China has surged from a low “Value-Added” production hub, to one of the leaders in AI technology. How did China close the gap with world leaders of AI industry in such a short period? What are China’s advantages compared to other countries, for example, in national policy, market size and data collection, and consumer adoption? Is China Patent Office becoming more friendly to AI technologies? What are the challenges for protecting AI innovations in China? Experienced at helping companies protecting their AI inventions in China, Chenyan gives us her personal story of riding the waves of AI growth in China.
