Elizabeth Crompton and Scott Cunning Named 2016 IP Litigation Rising Stars by Thomson Reuters

June 14, 2016

RELATED PRACTICES Intellectual Property

Haynes Boone Partner Scott Cunning and Associate Elizabeth Crompton have been featured in the 2016 Washington, D.C. Rising Stars listing in the Intellectual Property Litigation category published by Thomson Reuters.

Cunning assists generic pharmaceutical companies by helping them bring generic versions of branded products to market. He also counsels tech companies helping them to navigate patent disputes in federal district courts. Cunning's experience has spanned a diverse variety of technological areas including semiconductor processing, digital data compression, implantable medical devices, medical imaging devices, electronic patient diaries and methods of drug delivery. He helps lawyers inside pharma and tech companies face high-risk patent litigation.

Crompton is an experienced trial attorney who uses her advanced education and experience to understand complex technical matters and help clients achieve their goals. She concentrates on patent disputes before district courts and the Federal Circuit. Crompton also counsels clients on infringement, validity and enforceability of patents, particularly in the chemical/biological and mechanical areas, including Hatch-Waxman, as well as design patents.

Compiled through peer nominations and research, only two percent of young attorneys receive the Rising Stars distinction. Selected attorneys are 40 or younger or have been in practice for fewer than 10 years.
