Haynes Boone Guides TAO Digital Solutions Through $218 Million Sale

September 8, 2026

RELATED PRACTICES Emerging Companies and Venture Capital, Mergers and Acquisitions

Haynes Boone advised TAO Digital Solutions Inc., a global provider of AI-driven technology and product engineering services, in connection with its approximately $218 million sale to Cyient Limited.

TAO specializes in leveraging AI, data and cloud technologies to deliver solutions across a range of industries, including automotive, technology, fintech, healthcare and media. The acquisition will combine TAO's AI and data engineering capabilities with Cyient's global engineering platform to help clients pivot to a data-ready state that supports AI-enabled scale through robust data foundations, delivering accelerated outcomes and sustained competitive advantage.

The Haynes Boone team representing TAO Digital Solutions was led by Emerging Companies and Venture Capital Partner **Roger Royse**, with assistance from Counsel **Wei Li** and **Vanessa Plettes** and Associate **Andrew Lo**.

"This acquisition is an exciting next chapter for TAO and reflects the strength of the company's platform," said Royse. "We are pleased to have supported TAO through this sale and look forward to seeing the company continue to expand its capabilities."

Haynes Boone's **Emerging Companies and Venture Capital Practice Group** partners with entrepreneurs, startups and investors, offering guidance on entity formation, financings, commercial agreements, mergers, acquisitions and exits across industries such as technology, healthcare and fintech.
