Haynes Boone Contributes ‘Managing Offshore Vessel Construction Disputes Through Arbitration’ Chapter to GAR’s Guide to Energy Arbitrations – Seventh Edition

By James Brown, William Cecil, Andreas Dracoulis | June 11, 2026

RELATED PRACTICES International Arbitration, Energy Litigation, Energy, Power and Natural Resources, Offshore Oil and Gas Dispute Resolution, Oil and Gas Litigation

Haynes Boone London Partners **James Brown**, **William Cecil** and **Andreas Dracoulis** have contributed to the Seventh Edition of the *Guide to Energy Arbitrations* examining the key disputes that arise in offshore vessel construction projects and the role arbitration plays in their resolution.

Offshore Vessel Construction Disputes

The *Guide to Energy Arbitrations* is a widely regarded reference tool for energy companies, their advisers and arbitrators. Written by authors who are renowned in the industry, the guide compiles information on the multitude of issues that may arise in energy disputes and provides guidance for minimizing the risk of and resolving such disputes.
