Attorneys Edgar Klee and Joel Gonzalez Lopez Author Mexico Chapter of Chambers and Partners Corporate Tax 2026 Global Practice Guide

By Edgar Klee, Joel Gonzalez Lopez | April 15, 2026

RELATED PRACTICES Mexico, Corporate, International, Tax

The guide provides up-to-date insights on corporate tax regimes worldwide, including rules on corporate structures, taxable profits, incentives, deductions and the taxation of inbound and outbound investments.

Their chapter titled “Law and Practice” offers a clear overview of Mexico’s corporate tax framework – how companies are structured and taxed, the treatment of domestic and foreign income and key compliance obligations. It highlights defining features such as the 30 percent corporate tax rate, strict transfer pricing and anti-avoidance rules and Mexico’s increasing alignment with OECD BEPS standards.

Klee and Gonzalez Lopez also examine current enforcement trends, evolving rules for foreign investment and digital platforms and the growing importance of documentation and economic substance in cross-border transactions.
