PRACTICES Intellectual Property, Patent Prosecution and Counseling, Patents, Technology, Quantum Technologies

Eric is an associate in the Patents Practice Group. His practice includes counseling clients on a variety of patent matters, including the drafting and prosecution of patent applications related to machine learning, artificial intelligence, and medical devices.

Eric brings his extensive education in physics to assist clients in protecting their technology. He has experience with a wide range of technologies, including angle-resolved photoemission spectroscopy, transducer imaging, optical lattices, machine learning and artificial intelligence. In law school, he was an extern with the Duke Office for Translation and Commercialization, working to protect the intellectual property of the university.
