PRACTICES Energy, Power and Natural Resources, Project Finance and Development, Europe, Middle East and Africa, Finance, Joint Ventures, Multi-Currency/Cross Border Financings, International, Energy Finance, Renewable Energy, Traditional Power

Conrad Purcell is a partner in the Energy Practice Group in Haynes Boone's London office.

Conrad's practice focuses primarily on energy and infrastructure projects. He advises funders, sponsors and governments in the financing, development, acquisition and disposal of energy and infrastructure projects. He was recognized in *The Legal 500*, Legalease Ltd., 2021, with the following testimonial: "Conrad Purcell has impressed us with his professionalism, expertise and efficiency. He always delivers the best solution on time. We definitely would like to continue having Conrad for our future projects."

Conrad has experience in structuring, drafting and negotiating finance and security documents, as well as commercial agreements such as construction, operation, maintenance and management contracts, joint venture and shareholder agreements, and power purchase, tolling and offtake agreements.

Conrad advises on a wide range of funding structures including project finance from commercial banks, DFIs/MDBs, as well as ECA supported lending, vendor finance, mezzanine and other structured finance, private placements and a variety of institutional and retail bond issues.

Conrad has experience advising on projects utilising a broad range of new energy technologies including wind, solar PV and CSP, hydroelectric, biomass, tidal and energy storage, in established and emerging markets. In recent years, he has also advised on conventional thermal power projects and energy infrastructure, as well as on projects in health, housing, communications, transport and digital infrastructure.

Having worked as an in-house lawyer for a number of years, as well as in private practice, Conrad has a good understanding of the commercial positions that need to be reconciled for projects to successfully reach completion. He uses this experience to help parties achieve consensus during what can be long and complex negotiations, especially where projects are being developed in markets with few comparable or similar examples.

QUALIFICATIONS

EDUCATION

- Master's Degree, Cambridge University, 2006
- B.S.C. (Hons), London South Bank University, 1999
